PROFITABLE FOR PRINTERS

Study This Book—It is a Gold Mine *for the* Progressive Printer

IT IS MOST PROFITABLE and important that a PRINTER should acquire a thorough knowledge of Good Type Faces. Such knowledge is gained only by a careful study of Good Type Faces, and never before has there been such an opportunity for the effective study of Good Type Faces as is afforded by this book.

Study this Book page by page. It is not a mere price list, but a veritable Encyclopedia of Typographic Styles. Here are the Type Faces which have established the typographic fashions, and also beautiful examples of how these Type Faces can be used to please the Printer's Customers. These examples are not shown in this book to beautify it, but to demonstrate to Printers that Extra Profits may easily be obtained if the printing is done with Type Faces of Extra Quality in their Designs, which impart Extra Quality to the Printing.

Study this Book in the Interests of your own Customers.

After all is said and done, the Printer's work is judged chiefly by the Type Faces used in it. A Good Type Face may make poor paper and cheap inks passable, but the best qualities of papers and of inks are incapable of giving even a semblance of quality to Printing executed with Type Faces of inferior design.

Show your customers these beautiful Examples of Printing with Good Type Faces. These models will demonstrate to them the superior business-attracting power of Printing done with Good Type Faces, and persuade them to use More Printing and pay Better Prices.

Study *this* Specimen Book of Type Styles with the sole object of making it Profitable to yourself.
