

PLATE XXIV.

ORTHO CERAS COLUMNARE, HALL.

Page 411.

FIG. 1. View of a very fine specimen of this species, showing the surface markings, form of the septa, size and proportions of the siphuncle. From a specimen in the collection of Prof. Marcy.

ORTHO CERAS ANNULATUM, SOWERBY.

Page 411.

- FIG. 2. A specimen (a cast of the interior) of this species, showing the septa and siphuncle.
“ 3. A fragment, showing the angular form of the annulations and the lines of the septa.
“ 4. A fragment, showing the transverse or concentric undulating striæ, and the longitudinal ridges, forming nodes where they cross the annulations.

CYRTO CERAS LATERALE, HALL.

Page 407.

FIG. 5. View of a specimen of this species, showing a few of the septa, and the outer chamber strongly constricted below the aperture. This figure is erroneously referred in the text to *O. alienum*.

ORTHO CERAS ALIENUM, HALL.

Page 414.

- FIG. 6. View of a cast of the outer chamber of this species, showing the gradually tapering form and the broad constriction near the aperture.
“ 7. A section of a fragment, showing the septa and siphuncle.
