This book is for the Upper Forms in schools, and gives in simple language an account of the fundamental principles which underlie our modern economic and political conditions. Throughout, the present has been connected with the past, by noting the beginnings of corporate life and effort, and by tracing the development of political institutions.

The desirability of cultivating an intelligent patriotism is acknowledged by all, and there is a growing recognition that this can best be done, as in this book, by training in the young a conception of the value and meaning of civic and social responsibility.

Stories from the Old Testament. By E. M. WILMOT-BUXTON, F.R.Hist.S. Second Edition. Crown 8vo, 1s. 6d. [*Beginner's Books.*

These stories have been told in the simple and dignified words of the Bible, with brief explanations where necessary, and selected so as to show the continuity of the Divine dealings with the Hebrew people in preparation for the revelation of the New Testament.

An attempt has been made to avoid the chief difficulty met with in teaching the Old Testament to children, by basing these stories on the firm foundation of spiritual rather than literal inspiration. It is hoped that by showing that they are concerned rather with *values* than with supernatural history, they may never have to be unlearnt or unduly modified in later years.

Arranged in the form of consecutive stories, with brief explanations and connecting links where necessary, this volume forms a complete life of Christ, together with an account of the Early Church and the life of St. Paul. The stories are told almost entirely in the words of the Bible, and form a companion volume to "Stories from the Old Testament," by the same author.

ENGLISH

Grammar, Dictation, and Composition

A First Course in English. By W. S. BEARD. Crown 8vo, 1s. 6d. [*Beginner's Books.*

This book is a working class-book in English for the Lower Forms of Secondary Schools and pupils in Primary Schools. First, it provides, side by side, a progressive course in analysis and elementary composition; the use of words and their relation to each other in sentences. The exercises for practice are very numerous, varied, and carefully graduated; many exercises are adapted for oral composition. Second, it provides a textbook of the leading principles of grammar—accidence and elementary syntax—which will enable young pupils to apply these principles intelligently, step by step, to practical work in analysis and parsing. The book is specially suitable as an introductory course to "A Junior English Grammar," by W. Williamson. Sets of Examination Questions are included which will furnish useful preparation for the Oxford and Cambridge Preliminary and the College of Preceptors Examinations; also for pupils in Primary Schools preparing for County Council Scholarships.

A Junior English Grammar. By W. WILLIAMSON, B.A. With numerous passages for Parsing and Analysis, and a chapter on Essay Writing. Fifth Edition. Crown 8vo, 2s. [*Junior School Books.*

In this book the author, while following the lines usually adopted, restates many of the Definitions, reducing their number as far as possible. He endeavours to simplify the classification of the parts of speech, and pays considerable attention to the Gerund. To give freshness and a sense of reality to the subject, the examples in illustration of rules are taken from the everyday life of young people.

It supplies a progressive course in English composition, embracing not only essays and letters but also other important and useful work in writing English. Numerous and varied exercises are appended to each chapter, while questions and shorter exercises, many of which may be used orally, are introduced in the text. The importance of connecting the student's composition with his reading has been borne in mind throughout.

English Composition from Models. By C. ROONEY, B.A., LL.B. Crown 8vo, 2s. 6d.

This book is an attempt to apply the Direct Method to the teaching of English Composition. The models range from Bacon to Stevenson, and the extracts, which have been carefully selected, are calculated to interest senior

students. Emphasis is laid on the fact that to write we must read, and that to read with profit we must be interested. "All literary skill is based upon imitation." The book deals in an interesting way with certain inherent difficulties, and has useful hints as to how the literary taste of young people may be developed and guided. It is the work of a practical teacher.

Literature

English Literature for Schools. By E. E. FIRTH, History Mistress at the High School, Croydon, Author of "A First History of Greece." With 4 Maps. Crown 8vo, 2s. 6d. [*Junior School Books.*
This excellent Introduction to English Literature has five special features:—(1) By comparison the style and importance of the various writers are shown. (2) Many illustrations of their works help the reader to a knowledge of the great writers. (3) Difficulties are explained by footnotes. (4) Short summaries of the chief historical events are given with explanations of the political, social, and religious tendencies of the times. Thus the reader realises that all great writers are representative of their generation. (5) Useful Maps have been included, which show the local environment of the great writers.
At the end of each chapter are to be found summaries, sets of questions, and also suggestions for further reading.

A Short Story of English Literature. By EMMA S. MELLOWS. Crown 8vo, 3s. 6d.
The story of the beginning and growth of English literature told in a very simple form for schools and the home. In addition to describing the literature and writers, some space is given to describing the character of the age under consideration.

English Literature. By F. J. RAHTZ, M.A., B.Sc. Crown 8vo, 2s. 6d.
This work is suitable for pupils in the Upper Forms of Secondary Schools, and also for older students. Its aim is to review in a general but critical manner the groundwork of English Literature. Special attention has therefore been paid to the course of the development of our literature; the general characteristics of each period and the external influences bearing upon it are carefully explained. The work and style of the greater authors are discussed in some detail, and brief illustrative extracts from their works are given; lesser authors are treated in due proportion. Questions, many of which are suggestive and require further thought and study, are appended to each chapter.
The book will be found useful for such examinations as the Cambridge Senior Local and London Matriculation, and will form an excellent foundation for more advanced examinations.

Selections from English Literature. Vol. I. (1350–1700). By F. J. RAHTZ, M.A., B.Sc. Crown 8vo, 2s.

It is important for the student to have a first hand acquaintance with the authors themselves beyond what may be obtained from the brief extracts given in the English Literature above described. For this purpose two volumes of Selections, uniform with the "English Literature," have been prepared. The present volume covers the period from 1350 to 1700. Extracts are given from prose, poetry, and the drama. In dealing with verse, complete poems have been given where space would permit; and in the case of the drama, prose, and longer poems, the extracts are such as should be intelligible by themselves or with the aid of brief prefatory notes. As a rule, the space devoted to an author is in proportion to his importance.

Selections from English Literature. Vol. II. (1700–1900). By H. N. ASMAN, M.A., B.D., Second Master of Owen's School, Islington. Crown 8vo, 2s.

This is the second of two volumes of selections that have been prepared for use with "English Literature," by F. J. Rahtz, M.A., B.Sc.

The period covered is 1700 to the present day. The extracts from prose, poetry, and drama have been chosen to illustrate the various aspects of the work of the leading authors, and the general development of the literature of the period. Care has been taken that the selections should all be thoroughly worth studying.

The Story of Milton's "Paradise Lost." Narrated for the most part in the actual words of the Poet. Arranged by GEORGE CARTER, M.A., Headmaster of New College School, Oxford. Crown 8vo, 1s. 6d.

The main feature of this book is that the story of "Paradise Lost" is narrated for the most part in the actual words of the poet, but where this was found to be impracticable, short original passages are introduced to preserve the continuity of the story. Most of the classical and other allusions, which contribute little or nothing to the development of the story, are omitted. Concise footnotes are added to explain difficult or obsolete words.

The book is prefaced with a "Short Sketch of the Life and Works of Milton," and a Synopsis of "Paradise Lost" is also added.

Poetry

An Easy Poetry Book. Selected and Arranged by W. WILLIAMSON, B.A. Second Edition. Crown 8vo, 1s. [*Beginner's Books.*

A little book for pupils of twelve or thereabouts. It is believed that all the selections are good as poetry, healthy and invigorating in thought, and suited to the capacity of beginners.

Ballads of the Brave: Poems of Chivalry, Enterprise, Courage, and Constancy. From the Earliest Times to the Present Day. By F. LANGBRIDGE, M.A., D.Litt., Canon of St. Munchin's, St. Mary's Cathedral, Limerick. Fourth and Revised Edition, with Notes. Crown 8vo, 3s. 6d.

In this new edition Canon Langbridge has replaced all outworn matter by new poems, carrying the story and the interest down to the present hour. In addition to the best chivalric verse of Scott, Byron, Campbell, Keats, Tennyson, Browning, Macaulay, Aytoun, Kingsley, William Morris, Sir F. Hastings Doyle, the edition includes many copyright poems in praise of gallant thought or gallant deeds by the Poet Laureate, Watts-Dunton, George Barlow, Conan Doyle, Owen Seaman, Kipling, Newbolt, Noyes. It is a book for all who love and are proud of England, for all who love chivalry, adventure, and gallant pastime; pre-eminently, it is a book for high-spirited boys. It begins with the "Siege of Troy" and ends with a "Song of Federation," a call to the Boy Scouts, and England's claim to wield for ever "The Sceptre of the Sea." Careful notes, historical, critical, philological are given separately from the text.

Texts

Aristotle.—THE ETHICS OF ARISTOTLE. Edited, with an Introduction and Notes, by JOHN BURNET, M.A., Professor of Greek at St. Andrews. Cheaper issue. Demy 8vo, 10s. 6d. net.

An elaborate edition, based on the assumption that the Nicomachean Ethics is the authentic work of Aristotle, and that it has hardly suffered from interpolation or dislocation. It is also assumed that the Eudemian Ethics is our most authoritative commentary, and the parallel passages from it are printed under the text to which they refer. The commentary shows that most of the difficulties which have been raised disappear when the work is interpreted in the light of Aristotle's own rules of Dialectic.

HISTORY

Classical

Stories from Ancient History. By E. BOWYER, B.A., B.Sc., Assistant Master, Owen's School, Islington. With 2 Maps. Crown 8vo, 1s. 6d.

[*New Historical Series.*

This volume—the first of a new historical series on the lines of the recent circular of the Board of Education on the teaching of History—is intended as an introduction to the story of ancient history for pupils up to the age of twelve.

In accordance with the suggestions made in the above-mentioned circular, it deals with the "chief events and characters from the history of the most important nations in their traditional form." It aims also at "giving some idea of the nature of the great nations and stages in civilisation, centred round certain individuals or events in the chronological succession" in such a way that young children shall be able at least to "place" the most notable characters of ancient history.

This book is intended primarily for the use of students reading for the Oxford and Cambridge Higher Certificate, and secondarily as an introduction to a wider study of the subject. An attempt has been made to render some of the recently acquired archæological evidence accessible to those who have no expert knowledge. The recent papers set for the Higher Certificate have demanded far more than a mere collection of facts, and accordingly the present work has been written with a view to giving a general survey of the Greek race and of the broad principles underlying its history.

An Introduction to the History of Rome. By H. N. ASMAN, M.A., B.D., Second Master of Owen's School, Islington. With 2 Maps and 14 Illustrations. Crown 8vo, 2s. 6d.

This book gives to pupils learning Latin some knowledge of the history of the great people whose language they are studying. It has been insisted by educational authorities that some knowledge of the history of Rome is essential not only for a proper appreciation of Roman literature, but that it is also a necessary part of a complete education. This book occupies a place between the primer and the larger works on the subject. It gives a brief survey of the history of Rome to the death of Augustus. It will also be found useful for the general reader who desires some knowledge of the subject.

A Short History of Rome to the Death of Augustus. By J. WELLS, M.A., Fellow and Tutor of Wadham College, Oxford. With 3 Maps and 4 Plates. Eleventh Edition. Crown 8vo, 3s. 6d.

"The schoolmasters who have felt the want of a fifth-form handbook of Roman history may congratulate themselves on persuading Mr. Wells to respond to it. His book is excellently planned and executed. Broken up into short paragraphs, with headings to arrest the attention, his manual does equal justice to the personal and the constitutional aspects of the story."—*Journal of Education.*

Modern

Great Britain

Easy Stories from English History. By E. M. WILMOT-BUXTON, F.R.Hist.S. Sixth Edition. Crown 8vo, 1s. [*Beginner's Books.*

A historical reader arranged on the century method; that is, it aims at enabling the learner, before any detailed study is attempted, to run his eye over the centuries, and point out the main feature of each succeeding epoch. A special point in the method here adopted is the personal representation rather than the abstract idea. Each event has been grouped round the life or character of some "maker" of his country. The book contains thirty-five stories, well and simply told.

A Junior History of Great Britain. By E. M. WILMOT-BUXTON, F.R.Hist.S. Crown 8vo, 1s. 6d.

This book gives a systematic and interesting account of the history of Great Britain to pupils of ages ten to fourteen, who have hitherto studied the subject in the form of "Stories." To prevent it from being a mere outline, and in accordance with the Board of Education's Circular, many unimportant facts have been omitted, and the aim has been to give (1) a clear apprehension of the chief events in chronological sequence; (2) a fairly detailed study of those aspects which should specially appeal to young pupils. Not only have the more dramatic episodes of history been purposely selected for treatment, but these have been illustrated, wherever possible, by dramatic literature and by tableaux. The connection of history with literature has been maintained throughout.

A History of Great Britain. From the Coming of the Angles to the Year 1870. By E. M. WILMOT-BUXTON, F.R.Hist.S. With 20 Maps. Second Edition. Crown 8vo, 3s. 6d.

This book attempts to break through the conventional lines on which History Class-books are laid down. With very few exceptions these books make the reign the chapter-limit, and take each event in chronological order. In this book the old system has been entirely discarded, and each chapter will be found to deal with one great movement, which is traced in cause, events, and result. Another feature is the close connection which has been maintained throughout with European History. Since it is clearly impossible to grasp a great part of our internal history or any of our external relations without understanding the contemporary position of affairs on the Continent, almost every chapter will be found to commence with a brief explanation of the latter, pointing out the particular crisis with which England was especially concerned.

Methuen's School History of England

In Three Volumes

A History of England for Schools. Vol. I. To 1485. By H. J. CAPE, B.Sc., F.R.Hist.S., Headmaster of the Mathematical School, Rochester. Crown 8vo, 2s. 6d.

The author has endeavoured to carry out the suggestions contained in two recent and most valuable Memoranda of the Board of Education. By limiting the space devoted to the less instructive reigns, it has been possible to treat at greater length the events of outstanding importance, while the great movements of history are discussed in their European bearing and not merely from the influence which they exercised upon our own country.

It is, however, hoped that the book will satisfy the requirements of those who need a practical textbook for examination purposes.

A History of England for Schools. Vol. II. 1485–1714. By L. OLDERSHAW, M.A. Crown 8vo, 2s. 6d.

This volume aims at showing the position of England in Europe, and at sketching her internal development during the period when the foundations of the modern state and the Empire were being laid.

The Reformation and the counter Reformation, and England's attitude in regard to these movements, the Irish policy of the Tudors, and of Cromwell, the great struggle of the Executive and the Legislature, and the increasing attention paid to commercial problems and in foreign relations are among the larger questions dealt with in broad and simple outlines. As in the other volumes of the series, each chapter deals with a particular phase of the subject; illustrative extracts drawn from typical "sources" are added to many of the chapters, and its usefulness has been further increased by the inclusion of summaries and a biographical index.

A Short History of Modern England. 1714–1910. By ERNEST BOWYER, B.A., B.Sc. Crown 8vo, 2s. 6d.

This volume has been written, on modern lines, expressly for Upper Forms of Schools. In order to enable the young pupil to grasp the history of his country during the last two centuries as an intelligible whole, the economic side of England's history and the part she has played in international politics have been dealt with in greater detail than is usual in textbooks written for schools. Each chapter deals with a particular phase of the subject; illustrative extracts drawn from typical "Sources" are added to many of the chapters, and the usefulness of the volume is further increased by the inclusion of biographies and summaries.

Maps and illustrations are freely added, and each county volume is written by an author who has made a special study of the county he treats.

English Life Three Hundred Years Ago. Being the first two chapters of "England under the Stuarts." By G. M. TREVELYAN, M.A., late Fellow of Trinity College, Cambridge. Edited by J. TURRAL, B.A., Headmaster of the Blackpool Secondary School. Crown 8vo, 1s.

A graphic account of the state of England and English Society from 1603 to 1640.

A Constitutional History of England. By A. M. CHAMBERS, Honours School of Modern History, Oxford; History Mistress, Bedford High School. Second Edition. Crown 8vo, 6s.

This book is meant primarily for use in the Upper Forms in schools and for Students beginning more advanced work. It deals mainly with Saxon and Feudal Organisation, and with the evolution of the Central Government out of earlier institutions. The development of each branch of the Constitution—Executive, Legislature, and Judicature—is traced separately, but, as far as possible, the history of each subject is dealt with chronologically. The difference between the English and other constitutions is examined, and its chief characteristics are pointed out, while the relationship of the several branches of the Constitution to each other, now and in the past, is shown, and an attempt is made to suggest the practical effects of the present balance of power in the State on the Constitution.

Original Illustrations of English Constitutional History. Comprising a Selected Number of the Chief Charters and Statutes. By D. J. MEDLEY, M.A., Professor of History in the University of Glasgow. Crown 8vo, 7s. 6d. net.

This volume covers the whole period from the Anglo-Saxon laws to the Act of Union with Ireland. University teachers have long desired such a collection in a single volume. In those already published the pieces are translated. But since the object of this selection is that it should serve as an introduction to more extended study, the documents written in French or Latin are presented in the original language, and they are annotated throughout with extracts from other original material bearing on all important points, in order that each passage may be as far as possible its own interpreter.

Europe and the Empire

Six Ages of European History

FROM A.D. 476 TO 1878

Edited by A. H. JOHNSON, M.A., Fellow of All Souls' College, Oxford.
With Maps. Crown 8vo, 2s. 6d. each

The Dawn of Mediæval Europe, 476-918. By J. H. B. MASTERMAN, M.A., Professor of History in the University of Birmingham. With 12 Maps. Second Edition.

It is hardly possible to understand European history without some knowledge of the settlement of Europe after the Teutonic immigrations and the fall of the Empire in the West. This volume traces the successive rise of the Gothic and Frankish Kingdoms, leading to the establishment of the Holy Roman Empire under Charles the Great, and its break up under his descendants. The influence of the Eastern Empire, and the rise and conquests of the Mohammedan faith, are considered chiefly in their bearing on the development of Western Europe. Attention is directed especially to the central figures of the period: Theodoric, S. Benedict, Justinian, Clovis, Charles the Great.

The Central Period of the Middle Age, 918-1273. By B. A. LEES, Resident History Tutor, Somerville College, Oxford. With 10 Maps. Second Edition.

Opening with the election of Henry the Fowler, and closing with the rise of the House of Hapsburg to power, it covers the period of the struggle for supremacy between Empire and Papacy and of the gradual building up of the nations of modern Europe on the ruins of Imperial Rome. It traces the development of feudalism and monasticism, of chivalry and the Crusades, of scholasticism and the Universities, and connects these great movements with the great men who inspired and led them.

The End of the Middle Age, 1273-1453. By E. C. LODGE, Vice-Principal and History Tutor, Lady Margaret Hall. Second Edition.

The period which it covers is one of great importance. It marks the decay of the political system of the Middle Ages, and the disappearance of the old unity in Western Europe; whilst in it can be traced the growth of new ideals to take the place of the old, and above all the rise of nations. It is essentially a time of transition, a period of effort and experiment rather than of finished work. Its great interest lies in the fact that all the details of the history are part of this gradual change from the Middle Ages to Modern days.

Europe in Renaissance and Reformation, 1453-1659. By M. A. HOLLINGS, M.A. Second Edition.

This book deals with the formation of the modern European state-system, the Renaissance and Reformation (both Protestant and Catholic), the consolidation and ascendancy of France in Europe, and the Wars of Religion, ending with the Thirty Years' War.

The Age of the Enlightened Despot, 1660-1789. By A. H. JOHNSON, M.A., Fellow of All Souls'. With 11 Maps. Third Edition.

The period covered by this volume opens with the triumph of the monarchy of Louis XIV. and closes with the failure of the rule of Louis XVI. The aim of the volume is to bring clearly before the young reader the theory of monarchical rule represented by these kings, and to show when and why they succeeded or failed.

The Remaking of Modern Europe: From the Outbreak of the French Revolution to the Treaty of Berlin, 1789–1878. By J. A. R. MARRIOTT, M.A. With 10 Maps. Fourth Edition.

It contains a sketch of European history, presenting a vivid picture of the revolutionary period, of the rise and fall of Napoleon, and of the larger movements of European politics since Waterloo.

The book contains Vocabularies, Grammar, and Exercises, and no other textbook is required by the pupils. The Masters' Book is a commentary on the Pupils' book, and explains the system of teaching. It directs attention consistently throughout to the *meaning* of words, and thus explains the Grammar.

Chemistry

General

A Concise History of Chemistry. By T. P. HILDITCH, D.Sc. (London), A.I.C., F.C.S. Crown 8vo, 2s. 6d. [*Textbooks of Science.*

Primarily intended as a help to chemical students, more particularly those studying for University or advanced technical examinations, this book will also, it is hoped, prove serviceable to general readers who may wish to have a concise outline of the development of chemistry. Commencing with a general survey of the chemistry of the Ancients and the

Middle Ages, the author shows how the modern science evolved from these, and then proceeds to the history of the various branches — elements, minerals, organic, technical and physical chemistry, etc. A glossary of the most notable names in chemistry is added, and, as far as possible, the sequences of facts or theories have been summarised in tables which, while assisting the memory of the student preparing for examinations, may be omitted by the casual reader.

In this book the principles of the Infinitesimal Calculus and Differential Equations are developed from the most elementary foundations, and with special reference to chemistry. Since the application of mathematics is now necessary, not only in physical chemistry, but also in organic and inorganic chemistry and metallurgy, the book is addressed to a wide circle of readers.

Inorganic

Elementary Experimental Chemistry. By A. E. DUNSTAN, D.Sc. (Lond.), Head of the Chemical Department, East Ham Technical College. With 109 Diagrams. Fourth Edition. Crown 8vo, 2s. [*Junior School Books.*

The arrangement for this book is modelled on that of "Elementary Experimental Science." The subject is treated experimentally, and covers the necessary ground for Oxford and Cambridge Junior Locals, College of Preceptors (Second Class), and Board of Education (First Stage) Examinations. The author believes that the method adopted is truly educational. The subject is developed in a logical sequence, and wherever possible, historically.

An Elementary Text Book of Inorganic Chemistry. By R. LLOYD WHITELEY, F.I.C., Principal of the Municipal Science School, West Bromwich. Second Edition. Crown 8vo, 2s. 6d.

This book has been written primarily for the use of those who are commencing the Study of Theoretical Inorganic Chemistry on the lines laid down for Stage I. of that subject in the Syllabus issued by the Board of Education. The subject-matter of that Syllabus has consequently been fully discussed.

A Junior Chemistry. By E. A. TYLER, B.A., F.C.S., Head of the Chemical Department, Swansea Technical College. With 78 Illustrations. Seventh Edition. Crown 8vo, 2s. 6d. [*Junior School Books.*

The first twenty-three pages are devoted to the necessary physical laws and processes. The purification and properties of water are used to illustrate these processes. The student is thus led by a *continuous chain of reasoning* through the preparation of pure water to the chemistry of water, and hence to a knowledge of the fundamental principles of chemistry. The middle portion of the book treats of these principles, and then follows the study of certain typical elements and compounds. Problems and Examination Papers are appended.

A Textbook of Inorganic Chemistry. By G. SENTER, D.Sc., Ph.D., Lecturer at St. Mary's Hospital Medical School, Author of "Outlines of Physical Chemistry." With many Diagrams. Crown 8vo. 6s. 6d. [*Textbooks of Science.*

The book is designed as a general introduction to the study of Inorganic Chemistry. It is written throughout from the modern standpoint, so that the student who has worked through it should be in a position to profit from the reading of original papers, and to proceed without difficulty to the study of advanced works on the different branches of the subject. The theoretical part of the subject is distributed throughout the book, and as far as possible the facts on which the theories and hypothesis are based are given before the statement of the theories themselves. The great importance to the student of learning to draw a clear distinction between facts and theories is kept in mind throughout. The book is suitable for the Intermediate and Pass B.Sc. University Examinations and other examinations of similar scope.

The Complete School Chemistry. By F. M. OLDHAM, B.A., Senior Chemistry Master at Dulwich College. With 125 Illustrations. Sixth Edition. Crown 8vo, 4s. 6d. [*Textbooks of Science.*

A complete course in practical and theoretical chemistry up to the standard of the London Matriculation and Army Entrance Examination. It is so arranged that a boy with no knowledge of chemistry may begin the book and use it throughout his progress up the school. Short courses on volumetric analysis and on the common metals are included.

Practical Chemistry. Part I. By W. FRENCH, M.A., Examiner in Chemistry for the Union of Lancashire and Cheshire Institutes. Fifth Edition. Crown 8vo, 1s. 6d. [*Textbooks of Science.*

A course on purely inductive lines dealing with evaporations and distillations, filtration solubility, air, water, chalk, soda, common salt, sugar, compound and simple matter, etc.

Practical Chemistry. Part II. By W. FRENCH, M.A., and T. H. BOARDMAN, M.A., Science Master at Christ's Hospital. Crown 8vo, 1s. 6d. [*Textbooks of Science.*

A continuation of the above dealing with gases, laws of chemical combination, equivalents, atomic theory, molecular weights, symbols, sulphur, nitrogen, carbon, and their compounds, salts, acids, bases, valency.

A Practical Chemistry Notebook for Matriculation and Army Candidates. Easy Experiments on the Commoner Substances. By S. E. BROWN, M.A., B.Sc., Senior Science Master at Uppingham. Crown 4to, 1s. 6d. net.

The method is based on practical experience, and aims at maintaining interest by ensuring success and accuracy in experimenting. The chief objects in view are:—(1) a logical sequence in work and accurate experimenting by demonstration of practical use of apparatus; (2) to allow the teacher more time for individual attention, and to keep the class together at work on the same experiment. This is done by providing a series of practical problems to keep the more rapid workers employed, as well as for use in revision. Working for two hours (practical) per week, the course should be completed in about three terms. There are spaces provided for notes to be taken by the pupil.

A Senior Experimental Chemistry. By A. E. DUNSTAN, D.Sc. (Lond.). With Diagrams and Illustrations. Crown 8vo, 3s. 6d. [*Textbooks of Science.*

This volume is intended as a supplement to the author's well-known text-books, "Elementary Experimental Science" and "Elementary Experimental Chemistry." It will contain sufficient matter to provide for the remainder of a boy's school career, and will build up a sound development of modern chemical theory on the experimental foundation of his first two years' work.

The treatment will be based on the Periodic Classification, preceded by a discussion of the Atomic and Molecular Theories with the rudiments of Physical Chemistry, Thermochemistry, and Crystallography. The necessary Practical Chemistry will be incorporated and a section on Qualitative Analysis with the elements of Volumetric Analysis will complete the course. It is believed that this book will be of use to Second Year Students in Technical Institutes.

A Textbook of Practical Chemistry for Technical Institutes. By A. E. DUNSTAN, D.Sc.; and F. B. T. THOLE, B.Sc., Lecturer in Organic Chemistry, East Ham Technical College. Crown 8vo, 3s. 6d. [*Textbooks of Science.*

This Course of Practical Chemistry meets the requirements of the Upper Forms of Secondary Schools, where a good elementary foundation has been laid in the rudiments of manipulation. The book will be found useful also for classes in Technical Institutes and will cover the following ground:—

Qualitative Analysis of simple substances and of mixtures, Volumetric Analysis, Simple Gravimetric Analysis, Preparation of Pure Compounds, More difficult Quantitative Analysis, Qualitative Organic Analysis, Ultimate Organic Analysis, General Organic Determinations, Determination of Physical Constants.

An Introduction to Quantitative Analysis. By S. J. M. AULD, D.Sc.(Lond.), Ph.D.(Würzburg), F.I.C., F.C.S., Head of the Chemical Department, South-Eastern Agricultural College, Wye. With many Diagrams. Crown 8vo, 5s. [*Textbooks of Science.*

This book is a carefully selected study of the elements of quantitative analysis, providing a thorough introductory course, whereby the student is prepared for his more specialised analytical work, details and considerations of which are best obtained from the standard treatises and monographs.

Duplication is largely avoided by giving alternative methods for subsequent estimations of the same type. Special features are a theoretical chapter on indicators, and a description of exact laboratory methods for the determination of equivalents, etc.

The textbook contains all the inorganic quantitative work required for the Board of Education examinations and the Inter and Final B.Sc. Courses.

It will be noted that a complete and consistent school course in Experimental Chemistry, extending over five years, can be covered from Messrs. Methuen's list, as follows:—

First Year	Elementary Experimental Science, see p. 38, Chemistry Section, by A. E. Dunstan.
Second Year	Elementary Experimental Chemistry, by A. E. Dunstan.
Third and Fourth Years .	A Senior Experimental Chemistry, by A. E. Dunstan.
Fifth Year	A Practical Chemistry for Technical Institutes, by A. E. Dunstan and F. B. T. Thole; and An Organic Chemistry for Schools and Technical Institutes, by A. E. Dunstan.

Organic

An Organic Chemistry for Schools and Technical Institutes. By A. E. DUNSTAN, D.Sc. With 2 Plates and many Diagrams. Crown 8vo, 2s. 6d. [*Textbooks of Science.*

This book, which has not been prepared to meet the requirements of any particular examining body, is intended for the use of the higher forms of schools taking the Special Science Course, and as a first-year textbook in Technical Institutes. The author does not follow the conventional separation of Organic Chemistry into the two *ipso facto* inseparable domains of Aliphatic and Aromatic compounds, but endeavours to give a bird's-eye view of the more prominent features in the Science.

Second Year Organic Chemistry for Schools and Technical Institutes. By F. B. T. THOLE, B.Sc., Lecturer in Organic Chemistry, East Ham Technical College. With Plates and Diagrams. Crown 8vo, 2s. 6d. [*Textbooks of Science.*

This book forms Vol. II. of a series designed to meet the requirements of students in technical institutes. It deals with that portion of the subject necessary for the second year student, and covers the syllabus for Stage II. of the examination held by the Board of Education. It is hoped, however, that it will be found useful for those students taking the first year of their B.Sc. Course.

The book contains an account of the properties of the carbo-cyclic compounds, their general synthesis, and their utilisation for industrial and scientific purposes. Questions of constitution and the chief reactions associated with this class of compound are fully discussed and carefully explained.

Third Year Organic Chemistry for Schools and Technical Institutes. By T. P. HILDITCH, D.Sc.(Lond.), F.I.C. Author of "A Concise History of Chemistry." With Plates and Diagrams. Crown 8vo, 3s. [*Textbooks of Science.*

This book completes the course of organic chemistry whose earlier stages have been dealt with by Dr. Dunstan (Part I.) and Mr. Thole (Part II.). It is occupied for the most part with the systematic study of the different groups of heterocyclic compounds, especially those of practical or commercial value. The alkaloids, purines, and other cyclic urea derivatives, and numerous important dyestuffs fall within the scope of these chapters. The remainder of the book deals with the polypeptides, the terpenes, and some general problems such as the characteristics of residual affinity. The work is suited to the needs of honours students in this subject, either for the B.Sc. or the Board of Education examinations.

Qualitative Organic Analysis. By F. B. T. THOLE, B.Sc. With an Introduction by A. E. DUNSTAN, D.Sc. Crown 8vo, 1s. 6d. [*Textbooks of Science.*

This book is reprinted, with additions, from the authors' "Practical Chemistry for Technical Institutes" in such a form as to be self-contained. It deals with Organic Qualitative Analysis, both of simple compounds and mixtures. A large range of organic derivatives is dealt with, and the author confidently believes that the scheme will carry a student through the Organic Section of his Honours Degree Course.

A complete list of melting and boiling points is given, the substances being classified into their groups. Throughout conciseness and compactness have been aimed at, so that the student will have the information needed always at hand in an accessible form.

Modern Research in Organic Chemistry. By F. G. POPE, B.Sc. (Lond.), F.C.S., Lecturer in Organic Chemistry, East London College. Crown 8vo, 7s. 6d. [*Textbooks of Science.*

This volume is an attempt to bring, in a concise form, the development of some of the more important branches of organic chemistry before the chemical student. The results of the most recent research work are embodied in the text, and a bibliography is given at the end of each chapter, so that the student may be able to make use of current literature.

Physical

A First Year Physical Chemistry. By T. P. HILDITCH, D.Sc. (Lond.), F.I.C. Crown 8vo, 2s. [*Textbooks of Science.*

An attempt to render this branch of chemistry more easy to those commencing its study. The more elementary outlines of the subject are treated, as far as possible, from the standpoint of practical use in solving chemical problems; accordingly, the first part of the book is devoted to characteristic properties such as density or refractivity. Later chapters include introductions to the physico-chemical theories of gases and of solutions and the more important applications of these theories to pure chemistry. The book should prove useful to Inter. B.Sc. and Final (Pass) B.Sc. candidates, as well as those taking Board of Education examinations.

Outlines of Physical Chemistry. By GEORGE SENTER, D.Sc., Ph.D., Lecturer in Chemistry at St. Mary's Hospital Medical School. With many Diagrams. Third Edition, Revised and Enlarged. 5s. [*Textbooks of Science.*

This book is designed to serve as a general introduction to Physical Chemistry, and is specially adapted to the needs of electrical engineers, to whom an acquaintance with the general principles of this subject is becoming of increasing importance. Particular attention is devoted to the theory of solutions and to the modern developments of electro-chemistry. Only an elementary knowledge of mathematics is assumed.

Physico-Chemical Calculations. By JOSEPH KNOX, D.Sc., Lecturer on Inorganic Chemistry, Aberdeen University. Crown 8vo, 2s. 6d. [*Textbooks of Science.*

This book is intended for students of physical chemistry, as a supplement to the theoretical matter of lectures and textbooks. Here the theory is applied to the solution of practical problems. The book contains eleven chapters, dealing with the main subdivisions of physical chemistry. Each chapter consists of a short introduction dealing with the theory required for the solution of the problems, a series of typical problems with complete solutions, and a list of problems for solution with answers. Practically all the problems have been taken from the original literature of the subject, and by a careful study of the solved problems the student should learn much. The large collection of problems for solution should prove useful to teachers.
