1881-1900.
Twenty Years of Success and Increasing Popularity.

NOW LOCATED IN ITS OWN HOME, IN QUARTERS COMMODIOUS, CONVENIENT AND PLEASANT.

The
Beloit Savings Bank

ORGANIZED, MARCH 26, 1881.

On the "New England Savings Bank plan," it is the only real and true Savings Bank in Wisconsin.

INCORPORATED UNDER THE LAWS OF THE STATE.

Its affairs managed by a Board of competent Trustees, who are men well known to every citizen of Beloit, and its condition and management subject to examination and inspection by the State Bank Examiner, it is a safe place to deposit your savings.

IT RECEIVES DEPOSITS IN SUMS FROM 25¢ TO $1,000

And pays interest on same, in semi-annual dividends; having paid to depositors since its organization, in such dividends, the sum of $80,000.00.

ITS OBJECT IS TO PROVIDE A SAFE PLACE

For depositing your savings and to furnish loans on easy terms for those who wish to borrow money.

LOANS ARE MADE ON FIRST MORTGAGES

On Real Estate and other equally good security which is approved by the Finance Committee.

SAFETY DEPOSIT BOXES FOR RENT.

In equipping our new building a separate vault was provided, fitted with safety deposit boxes on the modern plan, with double-key system of boxes, assuring privacy and security. Rental of boxes from $2.50 to $5.00 per year.

OFFICERS FOR 1900.

Post Office Block. . . . BELOIT, WIS.
WATER SUPPLY—The city of Beloit has one of the finest water supplies in the country, which is remarkable for its medicinal qualities and its purity. The source of supply is evidently the same as that of Waukesha, Palmyra and other notable Wisconsin waters in this part of the state. The water is supplied by innumerable springs bubbling up in the bottom of a huge well thirty feet in diameter and forty feet deep. It is so clear and colorless that a cut-glass when filled to the brim looks no different than an empty glass of the same style, and the same great purity of the water is demonstrated by heating the residue, and it does not change its color. We give the interpretation of analysis made some time ago by Prof. E. G. Smith.

INTERPRETATION OF RESULTS.—The low amount of Free Ammonia, Aluminoid Ammonia, Oxygen Consumed, and Nitrates: and finally the physical properties indicate an almost absolute freedom from organic matters. (2) The Hardness is about the average of our surface waters. (3) The results of the analysis show this water to rank among the very best city supplies.

Signed, ERASTUS G. SMITH, Ph. D.

Since the analysis was made the continuous pumping has seemed to improve the quality of the water, as it now shows no trace of chlo ine.

The grounds of the Water Works occupy about five acres on the East bluff of the city. The water tower, nearly 100 feet high, is built of stone and is the finest and largest piece of stone masonry of the kind in the West. The tower sustains a large cypress tank holding 100,000 gallons of water, which is kept full at all times, day and night, and gives from its own head 60 lbs. pressure to the business portion of the city. The pump gives a direct pressure of 125 lbs., when required for fire purposes. In addition to the East Side water works, a West Side station is now located on Race Street, drawing from several wells there. This water is even better than the East Side well furnishes. Beloit has over 14 miles of water mains and over 115 fire hydrants, thus giving splendid fire protection as well as beautiful water for domestic purposes.
