Dear Reader:

The bimonthly "Technical Record" has been developed by the Southeastern Wisconsin Regional Planning Commission to perform three distinct and important functions:

1. To provide a concise historical record of the technical work accomplished under the Commission's regional landuse-transportation study.

2. To disseminate information on technical methods, techniques and procedures applied in the land use-transportation study and in other Commission programs.

3. To encourage an exchange of knowledge, ideas and concepts between technicians, engineers and planners engaged in similar endeavors elsewhere.

We hope you will find this and ensuing issues of the "Record" of particular interest and look forward to your comments.

Sincerely,

Kurt W. Bauer
Executive Director

J. Robert Doughty
Transportation Study Director
