

DIVISION OF TIME AND LABOR  
of  
R. V. Hurley, County Agent,  
During 1942

The chart on this page illustrates quite accurately the number of days and the percentage of time spent on each major project. Emergencies often arise during the year, such as a sudden outbreak of plant or animal diseases and various war time programs which require immediate attention, thus taking time from major projects.

Each year more time is required for the planning of programs of work for these work projects. Meetings of committees or group conferences are necessary if the work is to be done effectiently and the best results obtained for the expenditure of effort and labor.
