WEEDS

A. Mustard control
   1. Mustard and other broad leaved weeds cause much damage to small grain

B. Sinex
   1. A commercial chemical weed killer was recommended as a killer of mustard and all broad leaved weeds when applied in small grain

C. Demonstrations
   1. In June, the County agent, George Briggs, Agronomist, C. L. Zorsch, American Chemical Company, working with commercial sprayer in Town of Black Wolf fitted out a wood sprayer --
      300 gallon tank
      22 foot form
      Nozzles over 13 inches

   2. Spray mustard at about three leaves
   3. 65 acres sprayed in Oshkosh
      Vinland
      Omro
      Algoma
      Nokimi

   4. Result - 99% mustard killed, all broad leaved weeds killed, grain increased up to 50%.

D. Creeping Jonny
   1. Educational meetings
      a. Weed meetings in town of Omro - George Briggs
   2. Demonstrational meetings - town of Winnicoono, 1400 lbs. of Aticido used.
   3. 800 lbs. of Aticido sold through the county agent's office.

INSECTS

A. Grasshoppers - not much damage in 1941 - no action taken

B. Corn Borer
   1. The corn borer is with Winnebago County farmers. This insect is serious and has spread over the entire county. United action in a complete clean-up program is necessary.
   2. Meetings on corn borer will be located over the entire county this winter and spring of 1941. These movies were shown by Mr. A. L. Pillar, State Entomologist.

C. In July, an orchard and garden tour was held to study insect and disease trouble.
   1. Specialists - O. B. Combs
      R. A. Vaughn
