

will be given to students who have attended the full term and have taken all the examinations.

DAIRY COURSE CERTIFICATE

After completing the course every dairy student should work for a certificate. To secure a certificate the student must have spent a full term of twelve weeks in the Winter Dairy Course and passed a satisfactory examination in all exercises. A standing below 60 in any one examination makes the student ineligible to receive a certificate. He must also have worked in a creamery, cheese factory or other plant for two seasons. One of these seasons must follow the period spent here, and during this time the candidate must have practical charge of a department of the factory in which he is working. He will report the operations of his factory monthly, or as often as directed, on blanks furnished by the college.

The university will send an authorized person to inspect the factory of the candidate, and no certificate will be issued if an unfavorable report is made by the inspector. If all of the conditions are satisfactorily complied with, the candidate will receive a certificate. Owing to the expense of inspection, the university does not agree to grant certificates to students operating factories in other states, but arrangements will be made to do so if possible.
