ACKNOWLEDGMENTS

The Renovation and Restoration of the North Wing launched the twelve-year project to preserve and rehabilitate the Wisconsin State Capitol. The effort brought together architects, artists and engineers who worked to preserve the historic character of the building for future generations; inspired by history, they themselves created history with this vast undertaking. This historic structure report is dedicated to an enhanced understanding of the North Wing, its history and occupants, its restoration and its continued place at the heart of Wisconsin’s democracy.

A large team of professionals contributed to this report. Research was conducted by members of East Wing Architects, LLC (EWA) staff, including Anne Bieber, Kristin Berg, Keri Johnson, Jonathan Kasparek, Gretchen Wikan Lettau, Abigail Markwyn, Melinda Osman and Gerilyn Schneider. Written material was contributed by Anne Bieber, Keri Johnson, Jonathan Kasparek, Gretchen Wikan Lettau, Abigail Markwyn, Melinda Osman and Gerilyn Schneider of EWA; historical consultant John O. Holzhueter; and structural engineer Kurt Straus of Graef, Anhalt, Schloemer & Associates, Inc. Drawing on experience gained in working on the project, Larry Powers, Dan Green, Richard Shea and Mary Staveness of Affiliated Engineers, Inc. provided insightful review and comment during text development. Anne Bieber, Jonathan Kasparek and Melinda Osman, working closely with John O. Holzhueter, completed the editorial process. Beth Gullickson and Gretchen Wikan Lettau of EWA undertook the graphic design and layout of the volume, with the assistance of Melinda Osman as production coordinator. Daniel J. Stephans, Jim Schey and Gregory C. Barres of the Department of Facilities Development (DFD), Jim Draeger and James Sewell of the Wisconsin Historical Society, and retired Department of Administration architects Art McClure and Don Schraufnagel provided critical review of the text. Laura M. Davis of East Wing Architects provided drawing review. As project manager, Anne Bieber oversaw all phases of work.

Those who worked on the North Wing Renovation and Restoration generously shared their experiences with EWA; special thanks to Charles J. Quaglina of Isthmus Architecture, Inc., Mike Bath of the Division of Buildings and Police Services and Gregory C. Barres of the Division of Facilities Development. Denise Solie and the assembly sergeant-at-arms staff, as well as members of the Division of Buildings and Police Services staff, were willing to provide access to spaces and to share their knowledge of the Capitol.

The reference staffs at the State Law Library, the Legislative Reference Bureau and the Wisconsin Historical Society Library assisted EWA with research. Mary Parks of the Department of Public Instruction provided historic photographs of the North Wing. Richard Zeitlin, Carolyn Bohman and Lynnette Wolfe of the Wisconsin Veterans Museum graciously allowed access to its archives and provided historic images of the Grand Army of the Republic Memorial Hall. Michael J. Scheffler, Kenneth Ile and Ross Smith of Wiss, Janney, Elstner Associates, Inc. provided invaluable assistance with documentation of the exterior of the wing. Thanks also to the New-York Historical Society, the Avery Architectural Library of Columbia University and the National Archives in Washington, D.C. Special thanks to the Archives of the Wisconsin Historical Society, and especially to visual materials archivist Andy Kraushaar who assisted with the location and scanning of historic images.

Two people in particular have been responsible for the preparation of the North Wing Historic Structure Report. Anne Bieber of EWA guided the compilation of this volume with a strong commitment to conveying the architectural and historical significance of the Capitol. State Project Manager Daniel J. Stephans of DFD consistently supported the project, repeatedly affirming the importance of clear and thorough documentation of the wing’s history, including the recent Renovation and Restoration. It is intended that this volume be a useful resource for future caretakers of the Capitol and that, together with the other reports in this series, foster a greater understanding of the state’s most important governmental building.
