Hamilton Manufacturing Company

TWO RIVERS, WISCONSIN

August 30, 1943

Fellow Employees:

Below is a photostatic copy of a letter just received from the Honorable Robert P. Patterson, Under Secretary of War, informing us that the Army-Navy Production Award will be given to us.

This is a great honor and is one which less than 3% of the plants engaged in the manufacture of war material have received up to this time.

You have done an excellent job in making it possible for the Hamilton Company to do its full share in the war effort. However, we cannot stop here, the war is not yet won. This Award is given to us for a period of the next six months. In order to keep it we must equal or better our past performance.

We have plenty of work on which to perform. The management has absolute confidence in your ability and willingness to do in the future and until the war is won, what may seem impossible now, just as what seemed impossible a year ago resulted in your achieving this extraordinary honor.

A ceremony proper and fitting for the Army-Navy "E" pennant and lapel buttons will be announced later.

Sincerely

HAMILTON MANUFACTURING CO.

President
