

grows a choice brand of field peas. Northern Wisconsin can easily equal Canada. The same variety of pea vines which will grow 2.5 feet high in southern Wisconsin will stretch up to 3.5 and even four feet in northern Wisconsin. The yield of field peas is from twenty to thirty-five bushels per acre. They are free from the pea weevil. Peas can be grown for hay and the grain is an excellent food for dairy cows and fattening hogs. In the not distant future there will be factories established all over northern Wisconsin canning this delicious vegetable when in the best stage for preservation.

### **Corn.**

But I am asked: "What about Indian corn; will it grow in northern Wisconsin? By the proper selection of varieties and growing one's own seed, this greatest of all crops in the Mississippi valley will become a common one all over the north. If the farmers can grow corn as far north as Winnepeg, Manitoba, as they are doing, what is the use of questioning the possibilities of growing corn in northern Wisconsin?"

### **Other Grains.**

Oats, barley and wheat, especially the
