Through the kindness of A. W. Latham, secretary of the Minnesota State Horticultural Society, we are able to present to our readers for August a most excellent likeness of H. E. Van Deman, of Parksley, Va., who was at the head of the Pomological department at Washington during Secretary Rusk's administration. We are also able, from the same source, to present the cut and description of the Pearl goose berry as given in the Minnesota magazine for August. This new berry, originated by William Saunders, is highly spoken of by such horticulturists as Silas Wilson of Atlantic, Iowa, and the venerable T. T. Lyon of Michigan.

Have had several inquiries during the past month concerning care of grapes. Have not been able to obtain an article on that subject, but C. W. Sampson, an experienced grower of Minnesota, says: Vines need but little attention during August and September. Later on I will give his article as read at the Minnesota meeting and the discussion following the same.

WISCONSIN'S RESOURCES are attract-

ing general attention, and its railroads furnish the means to develop them. The limitless iron ore deposits of the Penokee and Gogebic Iron Ranges provide abundant opportunity for the establishment of Iron Furnaces and general iron working industries. Hardwood timber in great quantities attracts manufacturers of all wood articles, including Furniture, Woodenware, Staves, Headings, Hoops and Veneering; the Granite and Lime Stone quarries are attracting attention, as their quality is unsurpassed for fine building work and strong lime. Numerous Clay, Kaolin and Marl beds furnish the best material for Tile, Brick and Pottery.

All of these materials are located along the line of the **Wisconsin Central**, and any one who desires to locate a manufactory is requested to write us, as we desire to confer with everyone who wants a good location with facilities for reaching markets everywhere.
