STATE POLITICAL PLATFORMS

DEMOCRATIC PLATFORM

Adopted by the Democratic Platform Convention Held at Madison,
Wis., Pursuant to Law on the 18th Day of September,
1928, and Declaration of Principles

Declaration of Principles

WE, THE Democrats of Wisconsin in Platform Convention assembled pursuant to law this 18th day of September, 1928, do hereby most strongly approve and endorse the Democratic Platform adopted by the National Convention at Houston, Texas, and we especially endorse the outstanding, incorruptible and fearless candidates for President and Vice-President, Alfred E. Smith and Joseph T. Robinson.

The Maintenance of Free Government

"The blessings of free Government can only be maintained by a firm adherence to justice, moderation, temperance, frugality and virtue and by frequent recurrence to fundamental principles."

Sec. 22, Article 1, Cons. of Wis.

The Democratic Party of Wisconsin firmly believes in the principles of Thomas Jefferson laid down in the Declaration of Independence and incorporated into the Constitution of the United States and Constitution of the State of Wisconsin, guaranteeing and securing to the people religious freedom, industrial freedom, educational freedom, social freedom, freedom of the press, and the right of all men to worship God according to the dictates of their own conscience.

That the people by virtue of the Constitution have a right to change the fundamental law of the land if such law is unjust and inequitable.

We must return to the fundamental principles of Representative Government in order to save Democracy from being destroyed by special privileges and bureaucracy.

That some of the specific instances in which the rights of the people have been limited, if not abrogated entirely, are:

1. By laws providing for the forfeiture or confiscation of property as a punishment for crime.
2. By laws which directly or indirectly permit imprisonment for debt or contract.
3. By laws which to a great extent eliminate and destroy the fundamental guarantees of the Constitution of the United States and the State on unlawful searches and seizures.
4. By laws authorizing officers to arrest on the merest pretense with or without warrant and on suspicion.

5. By laws and ordinances or Legislative Bodies that have made acts of individuals the most innocent in themselves criminal and punishable as crimes.

The Democratic Party of Wisconsin condemn these laws and the unjust infringement thereby caused upon the fundamental rights of the people, and stand with the Democrats of the Nation with a united front and determined purpose to the end that "A Government of the people, by the people, and for the people may not perish from the earth."

Schools and Education

The Public Schools of the State have always received the careful consideration of the Democratic Party. The Constitution of Wisconsin formed and adopted by the Democrats provided for our admirable school system free to all and properly supported in the interests of all the people of the State. We recognize, however, that parents have the inherent right to educate their children in any school that they may choose. This right is recognized by the Constitution and will forever be zealously guarded by the Democratic Party.

Education is the keystone of democracy. We favor liberal financial support for all our schools, from kindergarten to state university, to the end that the children of the state, both rural and urban, may have equal opportunity to receive free education along lines best calculated to fit them for the various callings of life and the all important duties of citizenship. Recognizing the importance of maintaining a great state university and other institutions of higher learning and professional training, we favor good elementary, secondary and vocational schools taught by competent teachers. In order that educationally equipped and professionally trained men and women may be attracted to and retained in the teaching profession, we favor payment of adequate salaries to (and tenure in position for) teachers, and the retention of the teachers' retirement law now in effect. If the blessings of our free government are to be preserved for future generations, our system of education must be guarded jealously from sinister influences which seek to undermine the principles of democracy, and we condemn, in unsparing words, the use of school textbooks for selfish propaganda purposes.

Taxation

Taxes have increased in our State to an unreasonable extent. Conditions are such now that the burden of taxation is oppressive. Taxes have increased so enormously that something must be done to relieve the people of those burdens. In order to accomplish this, expenditures of public money must be curtailed and cut down. The Tax Commission recently made this statement: That the total direct taxes levied by all units of government in the State of Wisconsin, not including special assessments in 1912, was approximately \$54,000,-000 while in 1926 it had increased to the enormous sum of \$200,000,-

000—in a space of 13 years an increase of 190%, while the population increased only about 16%, and the valuation of property, particularly farm property, greatly decreased. Such conditions must be remedied to save the people from confiscation of property.

Our tax system in Wisconsin is complicated, cumbersome, unsatisfactory and inequitable. As a remedy the Democrats propose that the tax laws be simplified, including the law on assessment, levy and collection of taxes.

Income Tax Laws

While the Democrats favor a just and a fair Income Tax Law, we denounce the present State Income Tax Law, passed by the last Wisconsin Legislature as unjust, ill advised, and ask that it be repealed, and demand the passage of a law that will be fair to all and place the greatest tax burden on the largest incomes, due regard to be had to earned income and income earned otherwise, obtained.

Power Companies and Public Utilities

The Power Companies and Public Utilities of the United States and Wisconsin, by reason of special privilege legislation, consolidation and trust agreements, have obtained and exercise a complete, oppressive monopoly of rates and charges to consumers. Free competition has been eliminated and by manipulation and agreements they are imposing upon the consumer excessive, unreasonable, monopolistic rates.

We therefore demand legislation that will protect the consumer and restore competition and give the right to municipally owned utilities to fix their own rates without interference by the Railroad Commission, and provide just methods for extensions in cities and villages as well as beyond the limits for the benefit of the rural population.

Appeals From Commissions and Heads of Departments

The present system of procedure by which appeals are taken from Commissions, Heads of Departments and Officials, to the Circuit Court of Dane County is unreasonable, unfair and too expensive to all parties who have matters before these bodies and officials. Appeals should be to the courts of the county where the cause of action or matter arises.

Labor

Labor is not a commodity and should not be treated as such in the application of the antitrust laws of our country. We heartily approve of the principle of collective bargaining and if elected we pledge ourselves to the enactment and enforcement of such laws as will guarantee to the men and women who toil the rights guaranteed them by the Constitution of our State.

Administration of Criminal Law by Injunction

The administration of criminal law by means of injunction and in Courts of Equity by the equitable powers of such Courts is fraught with grave danger to our liberties. Such practice deprives the citizen of his inherent right of trial by jury as guaranteed by the Constitution. Therefore, the practice of invoking the equitable powers of the Court in criminal cases should be abolished, and the use of the injunction in labor disputes in cases where it does not involve a criminal offense should be confined within very narrow limits and surrounded by all the guarantees of the Constitution to which the individual is entitled, to the end that Government by injunction and the trial of criminal offenses by injunction be eliminated.

Settlement of Strikes and Lockouts

We pledge the Democratic Party when entrusted with power to devise a plan to be enacted into a law by which labor disputes may be settled peaceably without the strife, turmoil, suffering, and economic wastes which now usually attend labor disputes, and without the use of the injunction by the establishment of a Court or Board to whom the dispute must be submitted before a lockout is declared or a strike called.

Election and Election Expenses

We denounce the excessive use of money in elections as destructive of the principles of free government. Its appalling influence can hardly be overestimated. It places the dollar above the man; weakens the confidence of the people in the integrity of all public officials; strikes a deadly blow at our free institutions and menaces the very existence of the state.

We deplore the excessive expenditure of money on behalf of the successful candidate for governor at the recent Republican primary as contrary to the spirit of our corrupt practices law. It is an attempt to implant in Wisconsin the pernicious methods used in behalf of Vare and Newberry which met with just rebuke by the Senate of the United States and universal condemnation throughout the country.

The costly attempt by the moneyed interests of the Republican party to secure the veto power of our state, arouses a just suspicion as to the integrity of their motives.

Waterways

The Democrats of Wisconsin favor the improvement of all inland waterways and particularly favor the construction of a waterway from the Great Lakes by the way of the St. Lawrence to the Atlantic Ocean.

Agriculture

We know that no general prosperity of our people is possible unless our large population of agriculturists are included in such prosperity. We therefore heartily approve of the platform declarations contained in the Houston Democratic platform and declare that if entrusted with the Government of State affairs, we will cause laws to be enacted which will aid in the establishment of cooperative markets, including selling facilities in foreign markets, and to that end we favor a federal law requiring our ambassadors, ministers and consuls in foreign countries to furnish to the Agricultural Departments of the various state universities, reports of the annual crop conditions of the several countries to which they are credited, to enable our farmers to have reasonably prompt and accurate data of the conditions of the foreign markets.

The farmer today is receiving for his products a price approximating that which was paid in 1912, but he is paying for the things that he needs on the farm an exorbitant and monopoly price, which is from 100 to 150% higher than that which was paid in 1912. These prices have been held and maintained at unreasonable figures because the big manufacturer and jobber have entered into collusion to fix these monopolistic prices, enabled to do so by the unreasonably high Republican protective tariff laws. The unfair advantage thereby attained has, in the course of the past eight years, robbed the farmer of millions of dollars and will continue to so rob him until the matter is remedied.

While it is true that the Wisconsin farmer does not so acutely suffer from the prevailing stagnation and low prices of farm products, as the farmer of the western plains states, yet it is also true that the flood of farm mortgage foreclosures and the sale of farm lands for taxes in Wisconsin indicates very clearly that farming in the state is becoming a losing business. The Republican Party in its Kansas City platform boasts of prosperity brought about "*through the wisdom of the Republican policies*", and are now claiming, as it has always assumed, that it alone has a patent right upon American prosperity. The millions of men out of employment or working part time only, the thousands of bank failures during the past seven years of Republican rule, and the thousands of farmers evicted from their homes through mortgage foreclosures and inability to pay their ever increasing tax burden is a sufficient denial of this boasted prosperity.

Reforestation

Wisconsin was in years gone by a great timber state. Its once extensive forests of pine, spruce, hemlock and other woods suitable for building material are no more. The lands that grew these forests are for the most part unfitted for agricultural purposes. We believe that the state should engage in a systematic reforestation policy in all its non-agricultural lands and acquire further non-agricultural

lands in different parts of the state and there extend the work of reforestation. Untimbered lands through which manifold streams flow no longer respond to the requirements of bringing adequate moisture back to the soil. Through a scientific policy of reforestation aided by adequate fire protection the wild land now idle would produce lumber for the building of homes for the people at fair prices and raw material for paper mills and other woodworking industries. Thousands of acres of now idle lands in northern Wisconsin would thereby become used and useful. Those lands suitable for agricultural purposes based on the test of soil analysis would thereby be restored to a sphere of productive activity and increased industrial prosperity.

Conservation

Closely allied to a scientific reforestation policy is a policy of conservation of our natural resources. The conservation for future generations of the natural beauty of Wisconsin woods, rivers, lakes and wild life is of profound concern to all of our people. Unless our conservation policy is founded on these principles the wild life and beauty of Wisconsin will soon become extinct. We demand a correction of state laws so as to provide for full and complete fire protection. We commend a thorough and practical conservation of the natural resources and practical reforestation as above outlined affirming that fire protection is the corner stone of this policy. We pledge that all revenue derived from an economically sound and permanent conservation program will be expended in developing and in perpetuating the natural advantages of Wisconsin.

We heartily approve the present law sponsored by the Isaac Walton League. We pledge the faithful preservation of the laws principle as intended, doing away with politics in conservation.

The regulation of public utilities as administered by the Railroad Commission of Wisconsin gives rise to a situation demanding earnest and thoughtful consideration and action.

Municipalities owning "Utilities" are at present regulated and controlled by the Railroad Commission. This is uneconomic in principle, and contrary to the constitutional right of municipal home rule.

Millions of dollars are being annually exacted from the people of this State in excessive Electric and Telephone rate charged by public utilities operated throughout the State under authority of law sanctioned by the Railroad Commission.

Under the present statutes of Wisconsin the Railroad Commission has fixed an unjust and oppressive rate upon the rural communities served by Telephone Utilities by the adoption of the zone system, thereby imposing an unjust and unnecessary burden upon the farmers of this State.

These exactions strike with greatest force at the homes of the poor; the rates are graduated in such manner that the lesser users pay the highest rates. Under existing practice the people are powerless to obtain redress and the rates thus exacted constitute a burden

upon the shoulders of the people so great that any form of taxation, however excessive by way of comparison, pales in insignificance. The Democratic Party pledges the people of this state a correction of this over-shadowing evil, and in conformity with the policy of local self-government and home rule endeavor to restore to the people of this state a fair measure of relief in the amendment of existing legislation and make the same respond to the will and interests of the people as a whole and not a favored few.

Roads

We favor the building of good and durable roads but insist that the Highway Department of the State be lifted out of partisan politics; that there be appointed by the Governor with the approval of the Senate a person as the head of the Highway Department, such appointment to be solely on account of his ability and integrity, without regard to partisan politics, and that such appointee be held responsible for the work and accomplishments in the Highway Department. We favor a prompt and speedy elimination of railroad grade crossings in this State.

Office and Office Holders

There has been created in this State within the past 25 years a multitude of new offices and "there has been sent over the State swarms of officers to harass our people and eat out their substance." The Democratic Party of the State pledges itself to remedy this evil and to eliminate all unnecessary officers and office holders to the end that the people may be relieved of this burden. Further, the Democrats pledge themselves that all laws shall be enforced by and through the regular machinery provided by the Constitution and pursuant to laws enacted in conformity thereto, and condemn the undemocratic practice that has grown up in recent years that when new laws are passed in connection therewith there is provided a set of officers to enforce the same, sent out from Washington or Madison.

Economy

We pledge our Party to economy and the simplifying of our State Government to a reduction and consolidation of Commissions, and to eliminate all useless officials and employees to the end that government expenses and State taxes will be permanently reduced, and we favor a budget system so that the State finances be placed on an efficient business basis.

Water Power

We favor the ownership and control by the State of the water power resources and are opposed to all raids on or a clandestine acquiring by private interests of this one of the last remaining great natural resources in the possession of the people, and we therefore

favor a plan for State ownership and development of the State's extensive water powers for hydroelectric energy to enable the State to sell the power generated to the ultimate consumer at the lowest possible price.

Prohibition

The Democratic Party stands, as it has always stood, for the enforcement of all constitutional laws reserving, however, to the people, the sacred right to modify, amend or repeal such laws in manner provided by the Constitution, and the Democrats in convention assembled declare in favor of a fundamental change in the Eighteenth Amendment, (and the enforcement laws thereunder), and if there is no change in the 18th amendment we favor a modification of the Volstead law and the laws of Wisconsin to meet the views of the great majority of the people of Wisconsin as expressed in the recent state-wide referendum.

With this statement of the hopes, principles and purposes of the Democratic Party, our cause is submitted in calm confidence that the popular voice will rise above mere party fealty and render a just verdict in the interests of the people.

REPUBLICAN STATE PLATFORM

Adopted at the Republican State Platform Convention Held in the Assembly Chamber, in the State Capitol, in the City of Madison, Wisconsin, on Tuesday, September 18, 1928

WE, THE qualified members of the Republican Platform Convention, do pledge ourselves as follows:

We promise our loyal support to Herbert Hoover and Charles Curtis, Republican candidates for president and vice-president, respectively, and we endorse the platform adopted at the Republican National Convention held at Kansas City, Mo.

Taxation

The purpose of taxation is to raise funds to meet the necessary costs of government economically administered.

The national government, under a Republican administration, has inaugurated and adhered to a policy of economy and business sense in the conduct of federal affairs, thereby reducing the burden of taxation on the people.

We pledge ourselves to conduct the affairs of state government with economy and good business judgment.

The obligation to pay taxes should be based on ability to pay, the benefits enjoyed from organized society and the valuation of property to be protected.

The burden of taxation on property in many instances has become excessive. This is especially true with reference to homes and farms.

Government needs should be thoroughly studied and appropriations should be made to meet only such needs.

The practical way to reduce taxes is to reduce expenditures through economy and common sense business administration.

Efficiency in government is not possible with incompetent officials and faulty systems poorly administered.

The state income tax has become a recognized part of our fiscal system and we favor its retention.

We call attention to the fact that Wisconsin now has the highest income tax of any state in the union and any proposal to increase the income tax rates involves the danger of erecting barriers against the future economic growth and welfare of the state.

The income tax law of 1927 did not raise the rates but in effect resulted in a substantial increase of taxes for wage and salary earners, by abolishment of exemptions on income. We favor revision of the income tax law for the benefit of people with small incomes.

There are two effective means of keeping tax burdens within bounds:

1. Increasing the sources of taxes by stimulating the development of existing industries and by making Wisconsin attractive to new industries, thus developing local communities and producing more taxable wealth.

2. Obtaining in a greater degree a dollar of service or supplies for every dollar of state funds expended.

Budget System

We pledge ourselves to the inauguration of a thorough-going scientific budget system for Wisconsin. Such a system to give full protection to the taxpayers must provide adequate control of all expenditures as well as appropriations.

We favor a system of accounting so clear that the citizens of this state will know from what sources all income is derived and for what purposes all moneys are expended by each department, with statewide periodic publicity of such accounting.

We pledge ourselves to the reorganization of state government by consolidating boards, bureaus, and commissions, wherever practicable, to avoid duplication of effort and expense, and the abolishment of any not required for the efficient service of the people.

Farm Relief

Agriculture is man's basic industry and the independent farmer is the backbone of traditional Americanism. This great industry does

not now enjoy the prosperity of other business enterprises, and the independent farmer is in distress.

We favor an adequate Federal tariff upon agricultural products to minimize foreign competition and such increases in tariff rates as may be necessary to protect the home market of the American farmer.

We advocate such legislation as will aid cooperative organizations to increase and maintain membership, secure adequate and sound financing, and promote the coordination and strengthening of their marketing activities, for we believe that sound cooperative marketing is a vital step in the solution of the farm problem.

We recognize in the wide expansion of dairying in other states a grave threat to the future of Wisconsin's great milk producing industry. We favor such correlation of state and university departments, backed by enabling legislation, as will greatly improve the quality of Wisconsin's dairy and farm products, and will aid in all suitable ways to increase their consumption and sale throughout the United States.

Relief for the agricultural interests of our state is not wholly a problem of legislation. It will be aided by careful business management and wise expenditure of government funds which will tend to relieve heavy taxes on farmers and farm lands.

Such relief will assist in bringing to realization on our farms, a higher American standard of home life and living comfort.

New Industries

Farm, factory, and labor must prosper together. The populous industrial centers of the state afford a great home market for Wisconsin's agricultural products, but the value of that market to the farmer depends largely upon the degree of industrial activity. One proof of this assertion is the fact that serious delinquencies in taxes on agricultural lands are found principally in the nonindustrial parts of the state.

While Wisconsin is well located to become one of the increasingly important industrial states of the middle west, its past growth in manufacture has been largely due to the initiative and energy of industries within our boundaries which felt a loyalty and allegiance to the commonwealth.

New industries should be welcomed and assured an even opportunity with industry in other states. The state, with a national market for its products, will derive large additional income from industry. This income will be distributed to the people through additional pay rolls and taxes which will benefit the farmer, the merchant and the wage earner.

Labor

A good wage is the primary consideration of employment, which with the exercise of thrift will permit of a secure and independent

old age. It gives not only living comforts, but also attractive surroundings, thus realizing that high American standard of living which we acknowledge as our ideal.

The second consideration of employment is reasonable hours which permit time for education and recreation.

Wages and reasonable hours of work avail a man little unless there is continuous employment. It should be the concern of the state, insofar as it is practicable, to assist in bringing about a greater continuity of employment.

Unemployment is one of the greatest of our social and economic problems.

In the interest of permanent employment and in the interest of a more uniform flow of production, it is desirable to form a national bureau of statistics to collect and disseminate data on employment and business conditions throughout the nation.

The construction of state and federal works, such as waterways, docks, dams, public buildings and highways should be planned long in advance and executed as far as practicable during periods of depression in order to furnish employment to the surplus labor which exists during these periods.

We favor such laws as will increase safety, health and sanitation in employment.

We oppose the abuse of injunctions in labor disputes.

We believe that the interest and well-being of labor, both organized and unorganized, are of primary concern to state government and must be thoroughly protected.

Highways

A carefully planned system of highways is not only desirable for the well-being and convenience of our citizenry, but is also essential to the economical and progressive development of our state.

We favor the continuance of highway development as rapidly as available funds and economical administration will permit.

Our first consideration should be through routes. Connecting roads are also necessary, so that the agricultural areas of our state may have transportation facilities necessary to reach their markets economically.

We should not, however, build roads more expensive than are justified by traffic requirements or the needs of the people.

We favor the gasoline tax as one of the best means for obtaining the needed funds for highway maintenance and construction, and we also favor a fair re-adjustment from time to time of the distribution of the proceeds thereof.

The Highway Commission is charged with great responsibilities, involving interests of vital importance to the people which cost vast sums of money. We urge strict economy in the expense of state highway administration.

Aviation

We recognize aviation as essential to our future economic advancement and in the interests of safety and progress we advocate the enactment of a comprehensive state aviation code in harmony with the Federal law.

State Aid

There are communities which, because of local conditions, require special consideration and properly receive state financial aid to meet the necessary expenditures for schools, highways and other local purposes.

There is, however, a grave danger in a too general granting of state aid, which results in a careless expenditure of funds and a wasting of the people's money. State aid should be granted only after a thorough, impartial study of a community's facilities and its needs.

Education

The education of our future citizens is a most important duty of our state. Wisconsin spends more money for education than for any other purpose. While this great work must progress without interruption, strict economy and wise business judgment must be used in the proper expenditure of this largest item of state expense.

State appropriations for education are now so apportioned as to give reasonably equal educational opportunity for all, whether resident in remote rural districts or in the more prosperous districts of the state.

The "Wisconsin Educational Program" prepared by our present State Department of Education contains many meritorious proposals which should have the serious consideration of the legislature and the state government.

We pledge our support to a state educational policy which will develop and maintain a broad, comprehensive common school system in the cities and in the rural communities of the state, as well as adequate public facilities for higher education.

Teachers' Retirement Fund

We favor the State Teachers' Retirement Law, but the retirement fund, now in excess of twelve and one-half million of dollars, must be so managed that the purpose of its creation is not defeated. The fund was planned to give confidence and assurance in teaching as a profession. Bad management and political tampering will destroy the confidence so much desired. The fund should be considered as a trust by the state and subject to as careful restrictions as are private trust funds.

Waterways

The early construction of the St. Lawrence ship canal is an imperative national need, and will be of special value to Wisconsin and the other great central, northern and northwestern states.

Its completion will help to solve the agricultural problems by opening the Great Lakes to the shipment of products of the farms and factories of the central and western states to the markets of the world.

The St. Lawrence canal is a national problem and its cost of construction should be borne by the entire nation.

Wisconsin is equally interested in the government improvements of the Mississippi waterway for barge transportation.

Conservation

A sound and foresighted conservation program requires the good will and wholehearted cooperation of all people of the state.

The Conservation Act passed through the initiative and long continued effort of the Izaak Walton League, American Legion, protective and propagation organizations, and many civic organizations, embodies the spirit which should govern this administration in conservation matters.

We believe that all moneys paid by sportsmen and commercial fishermen in the form of license fees should be used for conservation purposes, and particularly in restocking and replenishing our diminishing supply of fish and game.

We favor the acquisition and maintenance of state parks, located so as to be accessible to all the people of the state, as funds can be provided.

Pollution of our waters is becoming an increasingly serious matter not only to fish and game but to public health. We believe in an intelligent and intensive study of the sources of pollution in order that these may be removed and the waters of our streams and lakes kept pure and wholesome.

Reforestation

Our forests are of basic importance to all branches of conservation and we favor a reforestation program which over a period of years will cover our denuded areas with trees. To this end we urge the federal government to acquire acreage for reforestation purposes.

We favor adequate legislation and cooperation by the state to the end that every agency, including private owners, towns, counties and state and federal government, participate in the work of reforestation.

We favor a continued study of the operation of the severance tax law to the end that large areas under private ownership may be reforested.

The greatest menace to Wisconsin forests and wild life is the fire hazard. We believe the control of this hazard calls for use of modern and practical measures, both by state and private owners.

We also favor the making of adequate surveys, maps and studies of this state for the purpose of best utilizing and increasing our natural resources.

We commend the educational work and accomplishments in conservation of the Izaak Walton League, American Legion, and far-sighted protective and civic organizations, and urge cooperation of all state agencies with these organizations in the vital work of conservation.

County Zoning

We favor the study of the principle of zoning as applied to the counties of the state for the benefit of the farmer and the state at large in order that the fullest economic advantage may be gained from the use of the land.

Upper Wisconsin Land

An immediate and satisfactory solution of the cut over land and delinquent tax problems of upper Wisconsin counties is imperative. We urge that the subject be studied by competent authorities so that a solution to this serious problem may be worked out.

Water Power and Public Utilities

We believe the development of the needed water powers of the state should be encouraged, but a careful study should be made of the valuation upon which public utility rates are based, and necessary legislation should be enacted to fully protect both the public interest and the interest of the small security holder.

The importance of definite information respecting water power development in Wisconsin was recognized by the last legislature, and a joint committee of its members was appointed for the purpose of making an investigation thereof, which committee has, ever since its creation, been actively engaged therein, through public hearings and by making surveys and studies of developed and undeveloped water powers in Wisconsin. This committee has also made an extensive study of government owned and operated plants in Canada, and will report to the next session of the legislature facts and conditions which will probably indicate legislation necessary to fully protect the public interest.

Prohibition

The people of Wisconsin have expressed their will as to the modification of the Volstead Act in a legally called and conducted referendum. It is to Congress that the people must appeal if there is to be any modification or change in the constitution or laws governing prohibition.

Penal and Charitable Institutions

In the field of the socially incapable, the state of Wisconsin has done little more than physically care for its socially unfortunate.

We favor a thorough study of this question looking to the formulation and adoption of a program which will provide not only ade-

quate care for the unfortunate, but also establish a thorough-going work of prevention.

Children's Code

A children's code replacing obsolete laws, with provisions protecting the child under present day conditions, should be enacted. The children's laws, under which we are now operating, were largely enacted at the time of the forming of the constitution in 1848, and for the greater part they have never been changed. They are out of harmony with present day needs, and are the cause of inadequate care, frequent neglect, and brutal treatment of children. This is a great social and economic question and we favor bringing into its consideration the most experienced and best minds trained in the subject.

Public Health

The consequences of sickness have long been recognized as a public economic responsibility. It will be our concern to promote measures which more effectively safeguard the public health.

Corrupt Practices Act

The Corrupt Practices Act was intended to preserve the integrity of our government. It does not, however, reach far enough to accomplish its purpose. The present Corrupt Practices Act should be amended and strengthened to prevent abuses.

State Appointments

Appointments to public office should be based on qualification for the position and willingness to serve the state unselfishly.

Wisconsin's Future

Wisconsin is a great state and its future is bright with promise.

It will progress as it should only if it has good government, and good government is possible only when citizens interest themselves in public affairs, acquaint themselves with the principles of parties and actively participate in government by casting their ballots in elections.

Cooperation through political parties provides the means to obtain the benefits and advantages of our representative form of government. The Republican party, with its record of performance and its purpose to serve the well-being of all our people, has earned the right to the position of the majority party.

We pledge ourselves to the best business administration of state affairs of which we are capable.

With a firm belief in the justice of the social and economic principles herein contained, this platform is submitted for the approval of Wisconsin citizens.

STATE PLATFORM OF THE SOCIALIST PARTY
OF WISCONSIN

Adopted September 18, 1928

OUR country in the past has enjoyed exceptional blessings which could not be credited to the wisdom of our ruler or to the excellence of our constitution. These blessings were the result of our vast natural wealth—timber, new farming lands, rich mineral deposits, etc. America also had the advantage of a large efficient, hard-working immigration which came to work at comparatively low wages although these wages were higher than what they had received in the old country.

Moreover, our country was comparatively thinly populated. Land was plentiful and cheap—and living conditions were simple.

Thus American labor, both in city and country, formerly escaped the worst features of the struggle for existence, which cursed the thickly populated sections of the world.

All this has changed. The United States has ceased to be a colonial country and we now have 120,000,000 people. Most of the available land has been taken up, and owing to capitalist control, the farmer is in danger of becoming a peasant like the European agricultural worker.

And the city worker is even worse off. Four million are unemployed and are continuously in need.

On the other hand, this is the age when mechanical power could be applied to the utmost benefit of all.

* * *

Mechanical progress, combined with the advance of chemistry and innumerable inventions, has given American industry the equivalent of the labor of three thousand million human workers—according to the United States Department of Commerce. And the output per worker—due to new machinery and more power—is constantly increasing.

If rightly used, this vast new production would naturally make America the land of general and overflowing plenty for all its inhabitants. But the fact is, that about 75 per cent of our population make a bare living—while more than 10 per cent constantly are in need of charity.

The sole reason for this condition is that the ownership and control of the equivalent of a billion horsepower of energy remains in the hands of a privileged few.

These few are the masters of our people. They make use of machinery only when they can make profits for themselves by producing. They care not for the well-being of the nation.

Moreover, honesty has never been at such a low ebb. Not only the oil investigation, but especially the investigation of the giant power lobby in Washington has shown incredible corruption.

Under this system political democracy has proved to be a snare and a delusion. "Bread is freedom—freedom is bread." An industrial democracy must be established in order to secure and perpetuate the political democracy.

To accomplish this by effective methods is the aim of the Socialist party.

The Socialist party of Wisconsin takes the following position in this campaign in order to carry out some of its purposes:

Public Ownership

1. For public ownership and public development of the water powers of Wisconsin. Also public ownership of a state system to coordinate local endeavor for the production and distribution of electrical energy—so that the people of the state may obtain power and light at the lowest possible cost.

2. The development of an effective state system of reforestation. The creation of joint reforestation areas between the state and counties, between the state and cities, towns and villages, so that each unit contributes to the reforestation project and is organized to fight fires—and so that each unit derives a portion of the revenue.

Repeal of Public Utilities Act

3. The Railroad Commission is a costly and useless department of our State government. The Wisconsin Railroad Commission must be shorn of all power to control and regulate public utilities and co-operatives. Such power in effect has already been nullified by the decisions of the United States Supreme Court and by the technical development of the public utility industries.

Expansion of Insurance

4. For the extension of the state insurance department so as to include state insurance against unemployment and sickness; also hail and tornado insurance. For the extension of state life insurance and of state fire insurance—and for the creation of a state insurance fund in connection with workmen's compensation, and also for state insurance to indemnify victims of automobile accidents.

5. For more liberal application of the Workmen's Compensation Law and for liberalization of the Old Age Pension Act.

6. For making the state constitution amendable by appropriate action of one legislature and a favorable vote of the people.

Right of Cities, Counties, Towns and State to Own and Operate Marketing Facilities

7. Villages, towns, cities, counties and the state to have the right to own and operate all facilities necessary to market and distribute the products of Wisconsin farmers and to own and operate other industries.

For the Repeal of Personal Property Taxes and for Higher Exemptions Under the Income Tax Law

8. For the gradual repeal of all taxes on personal property and improvements—and for the gradual increase of the income tax.

We call attention of the voters to the fact that all Socialist legislators have always voted for higher exemptions under the income tax law while the Republicans and Democrats have insisted on taxing small incomes. It is ridiculous for voters with small incomes to complain about their income taxes if they have voted to send Republican and Democratic legislators to Madison.

9. For the development of the St. Lawrence waterway as soon as possible.

10. For insistence on freedom of speech, freedom of the press, freedom of assemblage, freedom of conscience, religious and academic liberty. We are absolutely opposed to race hatred, national hatreds, religious hatreds and mob rule or rule by vigilantes.

Legal Right to Wines and Beer

11. Prohibition enforcement in the United States is the result of blind blundering legislative methods so characteristic of Republican and Democratic politicians. As one sane solution of this serious problem the Socialist party advocates legislation that will permit the domestic use of light wines and beer, and the manufacture for sale of alcoholic beverages by the federal government under strict safeguards and proper restrictions. Wisconsin was the first state in the union to obtain the sentiment of the people on prohibition by the 1926 fall referendum. This referendum was made possible by a resolution introduced by a Socialist legislator. The people would not have been allowed to express their opinion on this subject had there been no Socialist in the legislature.

12. In view of the fact that there is absolutely no difference in principle or in methods between the Republican and Democratic parties, it is evident to all citizens who do not indorse the corrupt and treasonable organizations of the two old parties that a new party is inevitable. Wisconsin Socialists hereby pledge themselves to help to organize a new political alignment of producers in opposition to the two venal and corrupt capitalist parties.

Socialists the Only Dependable Elected Officials

The Socialist party is the only political organization which guarantees that its elected officials will vote and act in accordance with the party platform as our past record proves. It is the only party that has always stood for its principles in peace and in war.

We indorse all the demands and planks of our national platform and urge all lovers of freedom to join with the city workers and the farmers to support and strengthen the position of the Socialist party, which stands for human brotherhood and the right of every one to the full value of his labor.

PROHIBITION PLATFORM—1928

THE platform convention of the Prohibition party, assembled according to law, in the State Capitol at Madison, on Tuesday, September 18, at 12:00 o'clock, hereby declares its purpose and principles as follows:

Our Party and Its Philosophy

Prohibition has at last taken the dominant position in American politics. The Prohibition party, since its organization in 1869, has persistently insisted on this viewpoint and its delegates in this state convention of 1928, would draw the attention of voters to the fact that this position has been remarkably vindicated by its acceptance by all the various organizations that are opposing the liquor traffic though they have not as yet determined to support the only political party that fully represents and champions their objective.

Our party at the beginning maintained that the legalized traffic in alcoholic beverages was at war with the Federal constitution, one of whose objects was "to promote the general welfare." Prohibition was firmly fixed on by it as the correct policy of government toward the traffic. More than that this principle was recognized in legislation and was made the basis of the first license law passed which prohibited all citizens from such traffic except those to whom a special permit was granted, the granting of which was optional with administrative bodies. The traffickers in drink were determined to interpret this permit as a right but in a long series of court contests it was the right to prohibit that was established and not the right to sell. The 18th amendment adds nothing to nor detracts nothing from the force of this principle so firmly established by court decisions and merely carries it to the logical conclusion that this policy of prohibition implies that no such permits shall ever again be granted by any legislative bodies, state or national.

The Prohibition party has ever maintained that this question is purely a political one, that it has nothing to do with personal habits or practices and undertakes only to regulate the right relationship between the members of society as involved in its distribution. We, therefore, invite all citizens, without reference to their personal conduct, who recognize in such traffic an ever present disturber of "domestic tranquility" and a constant menace to the "general welfare" to join with us in the determination to fortify the abolition of the drink traffic as a normal policy of government and an actual fact of administration.

We would draw the attention of voters to the fact that the so-called failure of prohibition is not a failure of prohibition but a failure to recognize the political nature of the drink problem and a failure to apply normal means of handling it through political administration. Instead of approaching it from the angle of practical politics it has been treated as a "great moral experiment, noble in

purpose which must be worked out constructively" that has prompted its advocates to bring about legislation and administration through the moral suasion system of nonpartisanism which has served only to free our regularly constituted authorities from their official responsibility. The scandalous enforcement that now obtains throughout the nation is obviously due to this nonpolitical attitude and is likewise responsible for the plain determination of the dominant political parties to dodge the issue in every conceivable way in order to keep both wets and dries in harmonious alignment within their respective political machines.

We maintain that prohibition, though established in principle beyond all controversy, will never be successfully administered until this attitude has been changed and until the ruling political parties, and not individuals, are held responsible for its proper enforcement. Believing that the Prohibition party holds the correct key to the solution of this problem we invite all those who are opposed to the present unsatisfactory situation and are yet longing for effective enforcement to join with us in the effort to place in power the Prohibition party that believes in the principle and is ready to assume full responsibility for its successful application.

Party Responsibility

Erroneous education leads to erroneous action in our politics just as it does in other phases of life. We declare that the Constitution established the fundamental principle under which the United States exists as a political party government, that it can be governed only by the political party elected to power by the votes of the people, and that it provides for political party government only in its provisions as to how the political parties shall be organized in their national committees and electoral college organized from the several states. There is no provision under the Constitution by which the individual voter can vote for President and Vice-President but he can only vote for the electors of the party as they represent the electoral college of his state.

We further declare that the liquor traffic was put into American political party politics the day when Congress passed the Internal Revenue Bill, and every other revenue act and every license law grew out of that first act of Congress. All the political blundering of the day comes from the false education of the people into the belief that they vote for men instead of policies as provided for in the principles of the Constitution.

The Farm Problem

The Prohibition party does not come forth and propose for agriculture something new in the law but we do come with the proposition that we enlarge the scope and application of a principle of law that has already been tried and is rooted in our jurisprudence to wit: fair, just and reasonable return on labor and investment. We pledge

the Prohibition party and its nominees to extend the scope of this principle for a fair and reasonable return on labor and investment to apply to agriculture in like manner and in like degree as to public utilities.

Court Decisions

We stand absolutely against the right of Congress to annul decisions of our courts in regard to the constitutionality of any law.

World Court

We believe any nation being a party to problems of an international character has a right to be heard before an impartial tribunal. The Prohibition party favors a capable impartial international court of justice to hear and decide and dispose of international problems.

Tariff

We favor a tariff schedule so arranged as to equally protect the farming and manufacturing interests; to this end we favor a reduction on the tariff on all highly protected articles to a point where taxes shall fall equally on the producer, be he farmer or manufacturer.

Conclusion

On this statement of principles and on its record of faithfulness proved by the reforms which it was the first to advocate, the Prohibition party summons all those who favor suppression of the liquor traffic, the enforcement of law, the maintenance of constitutional government, honesty and efficiency in administration, and the building of a better citizenship, to join with us in an effort to achieve these transcendent objectives.

SUMMARY VOTE FOR PRESIDENT

A Scene at Devil's Lake.

Sheep Raising is becoming an Important Industry in Northern Wisconsin.
